Re: 101 Crawfords Corner Rd, Town of Holmdel, Monmouth County, New Jersey

In response to your recent request for service on the subject property, the following information is provided regarding the process for obtaining electric service from Jersey Central Power & Light Company, ("JCP&L").

It has been determined that the subject property is within JCP&L's service territory. Electric service will be provided in accordance with JCP&L's Tariff for Service which is on file with and approved by the New Jersey Board of Public Utilities. Completion of your request for service is contingent upon your obtaining all required approvals from appropriate authorities and agencies, including, but not limited to, permits for construction. It will be your responsibility to provide JCP&L with complete electric load information and site plans for review, approvals, and engineering, etc. well in advance of construction of the proposed facility.

JCP&L will begin construction approximately ninety (90) days after receipt of the following items. Please bear in mind, however, that weather or terrain conditions can affect the anticipated work schedule.

- Signed agreement (Right-of-Way/Easement, URD Agreement, Fixed Bill, or Pay-Now/Pay-Later Contract) as applicable
- Payment of non-refundable contribution and/or refundable deposit, as applicable
- Site plan that has been approved by the municipality for the proposed development project, showing specific locations of all streets, curb lines, property lines, sidewalks, streetlights, and building location, where applicable.

The Applicant/Customer is responsible for compliance with all Federal, State and Local Codes. This includes but is not limited to the National Electric Code and the National Electric Safety Code. JCP&L reserves the right to refuse connection to customer premises that are not in compliance with applicable Codes.

The exact method of service to the point of delivery will be determined subject to the above-requested information and approval by our Regional Engineering Process. This may require the Applicant/Customer to provide a mutually agreeable location for a substation and/or pay for a prorated portion of the cost to upgrade system facilities or add other necessary equipment to the electrical infrastructure in order to meet your requirements.

Thank you for your inquiry. If you wish to proceed with this project, you'll need to apply for service by calling
1-800-662-3115. We look forward to working with you.

Respectfully,

George F.Salazar
